

Testimonial : Arte Living Design Studio

The Arte Living team designed our first condo unit some years back. We liked the open concept of the modern living room and dining area, drawing in the outdoor greenery into the living space. Carine has cleverly designed the space with the perspective of the users in mind rather than being just picture beauty. She also spent the time to find out our needs and provided us with practical solutions. One good example would be the incorporation of the hidden storage behind the main entrance to store the children's school bags, which avoided a clutter. Gary helped with the challenge of the adding the fourth bedroom, which was not deemed possible on the outset.

Subsequent to that, Arte Living did another renovation job for our rental flat, incorporated all our ideas with minimum investment for an enhanced rental value.

When we were moving on to our Semi-D house, we engaged Gary and Carine again to help us as we knew they would understand our needs. Again, they delivered a beautiful space for us.

This time they had the new challenges of putting on a new mezzanine floor as well as incorporation of "Feng-Shui" requirements. They were enthusiastic in helping us to source the right marble floor, furniture, lighting items and coordinating all the colour schemes together. Practical and usefulness of space, quality finishing and easy maintenance were keys to create the timeless look that we were looking for and they delivered.

Working with Arte Living was very easy for us. We only talk to Gary or Carine and they are so complimentary on their ideas and practical approach.

I would not hesitate to recommend Arte Living anyone looking to renovate their home.

Yours sincerely,

Fenton Foo
